Transfer of Funding for the EPA SITE Demo

Robert Benedetti, Associate General Manager
Environmental Restoration Management
EG&G Rocky Flats, Inc.

The EPA Superfund Innovative Technology Evaluation (SITE) field demonstration has been given high priority by EPA Region VIII and we wish to expedite efforts to make the demonstration occur by August 1993. EPA Risk Reduction and Engineering Laboratory (RREL) will be providing funding for the cost to conduct the field demonstration. EPA and CDH have determined that the SITE demo will have the highest priority of treatability studies under the Sitewide Treatability Study Plan.

Sufficient funding is allocated under the Sitewide Treatability Studies Work Package to begin development of a "proposal" detailing the work to be done and funding required. This "proposal," and the Albuquerque "checklist" need to be started immediately so that we can forward to Albuquerque to begin the transfer of funding from RREL to Rocky Flats, under DOE Order 4300.2B, "Work for Others." Additional funding to cover activities until RREL funding is available will need to be made available through BCP approval by the PCCB.

Although we expect no impact to IAG deliverable schedules, if an impact does become apparent, you will need to notify us immediately so we can begin discussions with EPA and CDH.

If you have any questions about this, please contact Scott Grace at extension 7199.

James K. Hartman
Assistant Manager for Transition
and Environmental Restoration
